A Wall-Painting project on
Sustainable Development Goals

B.Ed. 2nd year.
Session 2024-2026
Under
Asst. prof. Gagan Ch.Das
Department of Visual Art

About The Project

The wall painting project on the Sustainable Development Goals (SDGs) undertaken by the B.Ed. 2nd Year students of the 2024–2026 session was a meaningful initiative that combined creativity, collaboration, and social awareness. The project aimed to encourage students to develop creative ideas and transform them into an effective visual language through artistic expression.

In today's world, the importance of the SDGs has become more relevant than ever. Issues such as quality education, gender equality, environmental protection, good health, and sustainable communities require collective understanding and action. Through this project, we attempted to spread awareness about these global goals in an engaging and impactful manner so that viewers could connect with the message through art.

The project also served as a platform for the exchange of innovative ideas and teamwork among students. Working together on a common theme helped us develop leadership qualities, cooperation, communication skills, and a sense of responsibility. Each member contributed their imagination and artistic perspective, making the wall painting a reflection of unity in diversity.

We sincerely hope that this creative effort not only beautifies the surroundings but also inspires everyone to think about sustainable development and their role in building a better future for society and the environment.
